

THE VICE PRESIDENT

December 3, 2024

I am honored to extend my warmest greetings to all those convened for today's symposium.

Since its launch in 1999, the Chandra X-ray Observatory has played a crucial role in making the incredible potential of space real for more people across America. As the most powerful X-ray telescope to date, Chandra has transformed our understanding and appreciation of the universe.

To everyone gathered to celebrate this occasion: Your efforts enrich the space community while also strengthening our Nation's position as a leader in this critical field. I commend your extraordinary accomplishments and want you to know that your contributions will leave a lasting impact for generations to come. As the chair of the National Space Council, I am committed to building a more equitable and prosperous future in space, and I appreciate your partnership in this work. Thank you for all that you do.

May you all continue to inspire others and pave the way for many more years of success and groundbreaking discoveries. I send my best wishes for a bright future ahead.

A handwritten signature in blue ink, appearing to read "Kamala Harris", with a large, stylized initial "K" and a long, sweeping flourish at the end.
