Beyond CIAO 3

- CIAO 3 defines a new foundation (the `infrastructure' release)
- Time to build the house
- Many ideas!
- Internal debate has begun to examine priorities, find common ground
- Small effort now, while CIAO 3 testing/documentation continues
- Will present 4 `themes' that group related ideas
- All 4 are well worth developing: Looking for CUC inputs.
- Folding in (CUC recommended) Software Survey results
  - Antonella Fruscione will report

Beyond CIAO 3: Schedule

- Staffing profile of SDS/DS forces us to choose
  - baseline activities must continue
  - Larger reductions for CIAO and related work
  - Roughly factor 2 cut for CXC user software development
- Must now concentrate on 1 major theme at a time
- New 5-year CXC contract: sets timescale
- 3-5 major releases possible: 12-20 month major release cycle
- 1st major release (post-CIAO 3) will be Level 3 tools, pipelines (MSFC commitment). 6-12 months post CIAO 3.

Beyond CIAO 3: Four Themes

- VO-era CXC:
  - *Jonathan McDowell & Frank Primini*
- `Open’ CIAO:
  - *David Huenemoerder*
- GUIs for all:
  - *Douglas Burke*
- Better Mousetraps:

  “Build a better mousetrap and the world will beat a path to your door”
  - *Margarita Karovska & Aneta Siemiginowska*

Beyond CIAO 3:

- Your input please!
- Happy to receive emails
  - Can contain more detail than a simple report could accommodate
