assoc_delete_key

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Delete a key from an Associative Array

Syntax

```
assoc_delete_key (Assoc_Type a, String_Type k)
```

Description

The `assoc_delete_key` function deletes a key given by `k` from the associative array `a`. If the specified key does not exist in `a`, then this function has no effect.
