

AHELP for CIAO 3.4

bstring_to_array

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Convert a binary string to an array of characters

Syntax

```
UChar_Type[] bstring_to_array (BString_Type b)
```

Description

The `bstring_to_array` function returns an array of unsigned characters whose elements correspond to the characters in the binary string.
