

AHELP for CIAO 3.4

char

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Convert an ascii value into a string

Syntax

```
String_Type char (Integer_Type c)
```

Description

The char function converts an integer ascii value c to a string of unit length such that the first character of the string is c. For example, char('a') returns the string "a".
