*AHELP for CIAO 3.4*

## chdir

Context: [slangrtl](#)

*Jump to:* [Description](#) [See Also](#)

---

### Synopsis

Change the current working directory.

### Syntax

```
Integer_Type chdir (String_Type dir)
```

### Description

The chdir function may be used to changed the current working directory to the directory specified by dir. Upon success it returns zero; however, upon failure it returns -1 and sets errno accordingly.
