

AHELP for CIAO 3.4

dup

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Duplicate the value at the top of the stack

Syntax

```
dup ( )
```

Description

This function returns an exact duplicate of the object on top of the stack. For some objects such as arrays or structures, it creates a new reference to the array. However, for simple scalar S-Lang types such as strings, integers, and doubles, it creates a new copy of the object.
