ferror

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Determine the error status of an open file descriptor

Syntax

```
Integer_Type ferror (File_Type fp)
```

Description

This function may be used to determine the state of the error indicator of the open file descriptor `fp`. It returns 0 if the indicator is not set, or non-zero if it is. The error indicator may be cleared by the `clearerr` function.
