AHELP for CIAO 3.4

gmtime

Context: slangrtl

Jump to: Description See Also

Synopsis

Break down a time in seconds to GMT timezone

Syntax

```
Struct_Type gmtime (Long_Type secs)
```

Description

The gmtime function is exactly like localtime except that the values in the structure it returns are with respect to GMT instead of the local timezone. See the documentation for localtime for more information.

On systems that do not support the gmtime C library function, this function is the same as localtime.
