

AHELP for CIAO 3.4

isatty

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Determine if an open file descriptor refers to a terminal

Syntax

```
Int_Type isatty (FD_Type or File_Type fd)
```

Description

This function returns 1 if the file descriptor `fd` refers to a terminal; otherwise it returns 0. The object `fd` may either be a `File_Type` stdio descriptor or an `FD_Type` object.
