AHELP for CIAO 3.4

set_struct_field

Context: slangrtl

Jump to: Description See Also

Synopsis

Set the value associated with a structure field

Syntax

```
set_struct_field (s, field_name, field_value)
```

Description

```
   Struct_Type s;
   String_Type field_name;
   Generic_Type field_value;
```

The set_struct_field function sets the value of the field whose name is specified by field_name of the structure s to field_value.
