AHELP for CIAO 3.4

ds9_center

Context: ds9

Jump to: Description See Also

Synopsis

Center image at position

Syntax

```
ds9_center( x, y )
ds9_center( x, y [ coord_sys, handle ] )
```

Description

Shift image so that (x,y) is positioned at the center of the frame, using the same coordinate−system constraints as those described for ds9_get_coords().
