Bugs: acis_classify_hotpix

Caveats

1. ***WARNING: File /tmp/hotpixel_list.fits does not have any rows.***

   Some datasets will return this warning when `acis_classify_hotpix` is run, including when it is called by `acis_run_hotpix`:

   ```
   # acis_classify_hotpix (CIAO 3.4): WARNING: File /tmp/hotpixel_list.fits does not have any
   ```

   It just means that no hot pixels were identified in the observation, which is a normal occurrence.

The Chandra X−Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
