

Chandra

1. The Chandra X-ray Observatory, NASA's premier X-ray Observatory

For more information about the Chandra X-ray Observatory see "[About Chandra](#)" page on the Chandra Science WWW site, or the [Chandra Public WWW Site](#).

Possible Reference:

Weisskopf M.C., O'Dell S.L. & van Speybroeck L.P., 1996, SPIE, 2805, 2.

2. Subrahmanyan Chandrasekhar

Indian-American Nobel laureate in physics. Widely known as "Chandra". One of the foremost astrophysicists of the twentieth century. Discoverer of the Chandrasekhar limit to the mass of a white dwarf (and much else besides).

For more information about Subrahmanyan Chandrasekhar see "[The Man Behind the Name](#)."

3. "Moon" or "luminous" in Sanskrit (the full name "Chandrasekhara" in Sanskrit is "Shiva" , one of the Hindu trinity. "Subrahmanya" is Shiva's son.)

The Chandra X-Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
60 Garden Street, Cambridge, MA 02138 USA.
