# ChIPS: Chandra Image and Plotting System

A graphics command package used by CIAO tools, especially Sherpa. The object oriented design of ChIPS allows a user to modify a plot without repeating all the commands used to create it in the first place, and also to save and restore plots easily. It currently uses the SM package for graphical putput. You can find more information in the Introduction to Plotting Using ChIPS thread.

The Chandra X-Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
60 Garden Street, Cambridge, MA 02138 USA.
