evt

Abbreviated name for the "event" data product. This name may be followed by a "1", "1a", or "2", depending on the type of product and the type of observation. In all cases, the file consists of a table of <u>events</u>, and their corresponding properties, as measured for that observation. This data product is typically distributed in the "primary" directory.

For more information, see the event entry or the <u>Data Products Guide</u>.
