

LSF: Line Spread Function

Distribution produced by a monochromatic source in the spectral dimension, either PHA, PI (for non-dispersive detectors, e.g. ACIS), or dispersion direction (d) e.g. for the Chandra transmission gratings (HETG and LETG). Currently 1-dimensional in CIAO.

The Chandra X-Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
60 Garden Street, Cambridge, MA 02138 USA.
