I/O Bugs: fakeit

Bugs

1. ***Sherpa doesn't set the ANCRFILE keyword correctly when writing faked data to a PHA file.***

   When FAKEIT is run using a background dataset, RMF, and ARF and then the simulated data is saved, the BACKFILE and RESPFILE keywords have the correct value, but ANCRFILE is set to "none".

   Workaround:

   use `dmhedit` to add the correct ANCRFILE value to the file header.

The Chandra X−Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
