S−lang−related Bugs: get_axes

Bugs

1. ***WCS coordinates returned by Sherpa's `get_axes()` routine do not match those calculated by the `dmcoords` tool.***

   The values returned by `dmcoords` are correct. *Sherpa* calculates the correct values for fitting (it gets the sign right for the counts amplitude), but is bad for sanity checking or for use beyond *Sherpa* fitting.

The Chandra X−Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
